## 01

### INTEGRATE DATA SILOS & BOOST THE USE MICROSOFT OFFICE ONLINE WITH INTELLIGENT INFORMATION MANAGEMENT

M-Files for Microsoft SharePoint Online allows customers to use the Microsoft SharePoint Online view to manage all related information.

Connect all legacy data repositories. You can manage files from any system and repository.

Manage document versions and keep audit trails easily.

Allow users to operate their daily information and document management within a single view.

Gain the benefit of functionality to support business processes and workflows and improve compliance.

Improve governance but keep on working the way you're used to, with Microsoft Office 365.

Easily edit documents: full integration with Microsoft Online.

## DO YOU NEED TO:

1

*Drive digital business enablement with automated processes?*

2

*Bring all data repositories together without migration?*

3

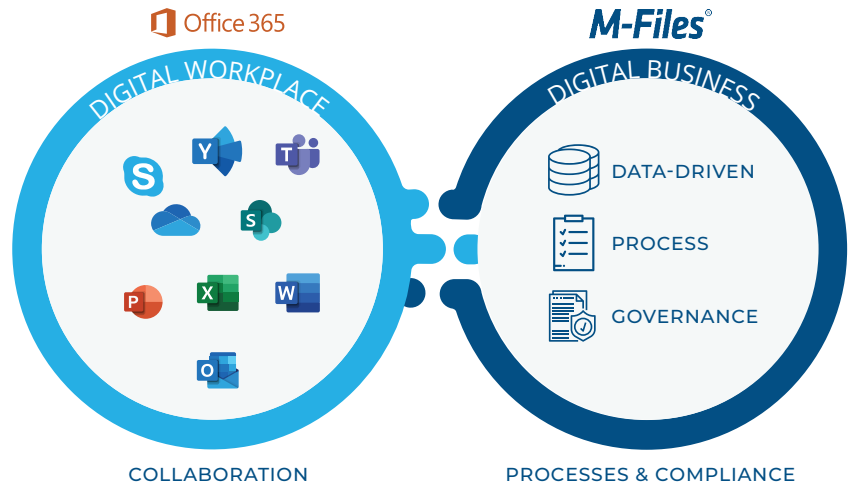

*Extend your Office 365 with Intelligent Information Management?*

## 02 FROM DIGITAL WORKPLACE TO DIGITAL BUSINESS

Both systems are needed:

Office 365 for casual content management, collaboration & co-authoring.

M-Files for streamlined processes and improved compliance

## 03 AUTOMATING BUSINESS PROCESSES HAS NEVER BEEN EASIER

### SUPPORT YOUR BUSINESS PROCESSES

-  Protect confidential information and control the visibility of information.
-  Create workflows and processes to support your business.
-  Leverage artificial intelligence to distinguish business-critical data from clutter.
-  Add sophisticated workflows to automate office work and improve compliance without moving away from the daily environment
-  Benefit from ready-made templates for several use cases and industries.

### LOCATION DOES NOT MATTER

-  Work with data and content from any user interface
-  Work offline
-  Work with mobile devices, web application, or the desktop client
-  Work in the cloud, on premises, or in a hybrid installation.
-  Access your content in any system or repository
